

# Chisel Paste

Epiroc Chisel Paste is a specially designed grease used for lubricating the wear bushings of hydraulic breakers. It prevents cold welding in the area of the bushings.

Standard greases (i.e. those used on excavator bearings) are not designed

for the high temperatures that result from the friction between the working tool, bushings and retainer bars when the hydraulic breaker is in operation. They liquefy and disappear. Without greasing, the parts involved in the friction will suffer from accelerated wear.

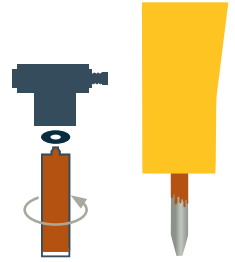

**United in performance.  
Inspired by innovation.**

[epiroc.com](https://www.epiroc.com)

- + Excellent performance at high temperature**
- + Tailor made for breakers**
- + Less wear**
- + Long tool life**
- + Reduced cost of operation**

Lubricate at regular intervals. Do not over lubricate. Reposition tool at regular intervals to avoid overheating.

Features	Benefits
<ul style="list-style-type: none"> <li>Excellent EP (Extreme Pressure) properties and good release effect.</li> </ul>	<ul style="list-style-type: none"> <li>The solids content (specially the metal content) acts as a ball bearing, resulting in considerably less wear on the bushings and working tools.</li> </ul>
<ul style="list-style-type: none"> <li>Temperature range from -20°C to +1100°C/-4°F to +2012°F</li> </ul>	<ul style="list-style-type: none"> <li>You can work with your breaker long, continuous periods, even in warmer climates, with the Chisel Paste keeping its protective properties.</li> </ul>
<ul style="list-style-type: none"> <li>Age-resistant composition</li> </ul>	<ul style="list-style-type: none"> <li>No need to replace grease cartridges after long idle periods of the breaker. Chisel Paste keeps their protective properties, even when breaker is used occasionally.</li> </ul>
<ul style="list-style-type: none"> <li>Epiroc Chisel Paste is available on Contilube II™ and Contilube™ II Micro cartridges. They can be refilled using grease containers of 18kg and 45kg (39.68lb and 99.2lb).</li> </ul>	<ul style="list-style-type: none"> <li>Fast and clean change of cartridges on the Contilube™ II lubrication system, when you run out of Chisel Paste.</li> </ul>

### Chisel paste

Cartridges/Buckets	Use	
 <b>150g/5.3oz</b> cartridges for Contilube™ II Micro	For automatic lubrication in Epiroc breakers fitted with Contilube™ II Micro. Refillable.	
 <b>500g/17.6oz</b> cartridges for Contilube™ II	For automatic lubrication in Epiroc breakers fitted with Contilube™ II and manual greasing with a grease gun. Refillable.	
 <b>400g/14oz</b> cartridges	For manual greasing with a grease gun in all breakers, including handheld hydraulics, from all brands.	
 <b>18kg/39.68 lbs</b> buckets	For manual greasing with a grease gun or for refill of Contilube® II cartridges.	
 <b>45kg/99.2 lbs</b> buckets	For manual greasing with a grease gun or for refill of Contilube® II cartridges.
